

## Create the Flask Application

Date	17 November 2022
Team ID	PNT2022TMID48052
Project Name	Smart Fashion Recommender Application

### Flask code and running :

The screenshot shows the Visual Studio Code editor with a file named `app.py` open. The code defines a Flask application with a single route `/` that returns `<p>Hello, World!</p>`. The terminal at the bottom shows the command `python app.py` being executed, which starts the Flask development server on `http://127.0.0.1:5000`. A warning message is displayed: `WARNING: This is a development server. Do not use it in a production deployment. Use a production WSGI server instead.`

```
File Edit Selection View Go Run Terminal Help
app.py - documents - Visual Studio Code

app.py 1 x
1 from flask import Flask
2
3 app = Flask(__name__)
4
5 @app.route("/")
6 def hello_world():
7     return "<p>Hello, World!</p>"
8
9
10 if __name__ == "__main__":
11     app.run()

PROBLEMS 1 OUTPUT DEBUG CONSOLE TERMINAL SQL CONSOLE
